DIRECTOR'S PROFILE

The main goal of 360 juniors is that each and every child can be start their nurture with enjoying their education. To provide the atmosphere for 360 holistic development, we don't believe in the textbook's first page to last page education pattern which is already running in this country: Text, tuitions, homework, extra activity, this class, that class... whatever else... "Bachha kaise develop hoga 360?" We are believing in that type of education system in which they can develop not only in textbook but their education help them in their better livelihood.

"The man making education" which was provided in our gurukuls by rishis, that type of education had life science and moral education. To get this type of education the scholars had to leave the home and live in gurukuls but with the modern time and lifestyle, our team has developed and bring the 360 developmental goal achieving theory at your doorstep.

360 juniors wants to develop every type of child with our traditions & technology both, by that they will **BE** the universal individual so they will be able to accept everyone and **MAKE** them also alike them and be the family and fill the world with the approach of "Vasudhaiva kutumbakam."

We are dedicating this international level syllabus in both Gujarati / English / Hindi languages to the society.

Thanks and regards.
